

Table of Contents

Chapter 1 Expression of Load Distribution	1
(1) 3 kinds of load	1
(2) Distributed load	2
(3) Concentrated load	9
(4) Concentrated moment	14
(5) Superposition of load	16
(6) Summation of load	19
(7) Differential of sheering force and bennding moment	23
 Chapter 2 Functional Type Hyper Function	 30
(1) Comprehensive integral within an interval which contains a point inintegrable	30
(2) Comprehensive integral which interval has infinite length	??
(3) Functional	??
(4) Difinition of hyper function	??
(5) Interval where a hyper function equals to a function	??
(6) Calculation of hyper function	??
(7) Distribution and functional type hyper function	??
 Chapter 3 Comparison between Concentrated Load	 ??
(1) multi stage deduction	??
(2) Detail function without confirmation of existense	??
(3) Introduction of microdomain radius parameter into Dirac function	??
(4) Separation of singularizing parameter from microdomain radius parameter of detail function	??
(5) Elimination of input function from expression of functional type Dirac function	??
(6) Introduction of microdomain radius parameter into regular point	??

(7) Reexamination of domain	??
(8) Idea of component type hyper function	??

Chapter 4 Component Type Hyper Function	??
(1) Definition of hyper function	??
(2) Function regarded as hyper function	??
(3) Relation between hyper functions whose number of components are not equal	??
(4) Calculation rule of hyper function	??
(5) Lateral translation	??
(6) Constant multiple and sum of hyper function	??
(7) Inversion	??
(8) Product of hyper function and differentiable function	??
(9) Derivative of hyper function	??
(10) Definite integral of hyper function	??
(11) Primitive function of hyper function	??
(12) Fundamental function	??
(13) Distribution and component type hyper function	??

Chapter 5 Approximate Function Expressed by Integer Power Polynomial	 ???
(1) Approximate function of Heaviside function expressed by 5th power polinomial	???
(2) Approximate function of partial 1st power polinomial expressed by 6th power polinomial	???
(3) Approximate function of Dirac function expressed by 4th power polinomial	???
(4) Approximate function of Dirac function expressed by 6th power polinomial	???
(5) Indifferentiable approximate function	???

- (6) Derivative of approximate function of Dirac function ·····???
- (7) Finite times differentiable approximate function ·····???

Chapter 6 Infinitely Differentiable Approximate Function

- ???
- (1) Approximate function with foot type ·····???
- (2) Approximate function without foot type ·····???
- (3) Limit variation of with foot type ·····???
- (4) Limit variation of without foot type ·····???
- (5) Generalization of foot ·····???
- (6) Product of function and Heaviside function ·····???

Chapter 7 Discontinuous Function ·····???

- (1) Germination of function ·····???
- (2) Definition of function ·····???
- (3) Piecewise continuous function ·····???
- (4) Modification of definition of function with regard to discontinuous function ·····???
- (5) Tendency resulting loss of unambiguity of function ·····???
- (6) Another method of modification of definition of function ·····???

Chapter 8 Internal Variartion of a Point ·····???

- (1) Variation of approximate function within a microdomain ·····???
- (2) Origin of approximate function ·····???
- (3) Concentration of definite integral ·····???
- (4) Equivalent internal variation ·····???
- (5) Smooth step and smooth refraction ·····???
- (6) Basic concept about differential calculus ·····???

Chapter 9 Application of Component Type Hyper Function to

Structural Mechanics ·····???

- (1) Expression of load ·····???
- (2) Concentrated load and concentrated moment ·····???
- (3) External force loaded on a beam ·····???
- (4) Moment of external force loaded on a beam ·····???
- (5) Calculation of reaction force at support ·····???
- (6) Sheering force ·····???
- (7) Bending moment ·····???
- (8) Differential equation of deflection curve ·····???
- (9) Fourth order differential equation ·····???

Chapter 10 Distribution of Mass ·····???

- (1) Outline function of mass distribution ·····???
- (2) Detail function of mass distribution ·····???
- (3) Concentrated mass and Dirac function ·····???

Chapter 11 Additional Items ·····???

- (1) Real axis step type hyper function ·····???
- (2) Operational type hyper function ·····???
- (3) Definition of hyper function using sequence of functions ·····???
- (4) Even hyper function and odd hyper function ·····???
- (5) Discussion on generalization of a concept ·····???
- (6) Think concentrated force as if it was distributed force ·····???

[Indexes] ·····???
